**Orange Township  
Fire Department**

**Did you know that employees are required to obtain fire safety training at least annually?**

### **BullsEye Laser Driven Training System**

The BullsEye represents the latest advancement in fire training technology.

BullsEye senses where the user aims and sweeps the laser training extinguisher and automatically varies the LED driven digital flames in response. This allows your trainees to learn how to effectively use a fire extinguisher without the cost and clean-up associated with using dry-chemical or CO2 extinguishers.

The BullsEye's electronic control system responds to the trainees' actions, putting the fire out only when the extinguisher is used correctly.

### **Clean Training**

BullsEye uses a conical laser to replicate extinguisher discharge rather than depending on a dry-chemical or CO2 extinguisher.

Because only laser light is emitted from the training extinguisher, extinguisher training can now be conducted virtually anywhere. BullsEye's digital flames also respond to BullEx's compressed air and water SmartExtinguishers for additional training variations.

**Test your knowledge on how to use a  
Fire Extinguisher. Go to the  
web site below:**
